This bull comes from the most profitable cow in our herd. The sire, Shaver Caesar, is believed to be the best bred bull in North America amongst the Lincoln Red breed. With that background, it is no surprise that he gained 3.3 lbs/day from birth to weaning with no creep feed. This bull will bring easy fleshing, moderate frame and great carcass quality to your herd in addition to a nice rate of gain.

This 92.2% Lincoln Red is sired by Shaver Caesar who is believed to be the best bred bull in North American amongst the Lincoln Red breed. His dam is one of our top cows. This bull gained 2.8 lbs/day from birth to weaning with no creep feed. This bull exhibits tremendous depth of body with some good fleshing ability. He will bring great skeletal structure with smoothness and balance to your herd. With his 84 lb. birth weight you will not have to be concerned with calving difficulty.
